FABER-CASTELL

since 1761

Office

Dear Partner,

The strong global demand for creative products as a counter to the flood of electronic information and digitalisation has enabled Faber-Castell to have one of the most successful years in the history of the company. For your trusting and successful collaboration, you have our sincere thanks. We view the high level of trust that our partners and end consumers* have for our brand as an incentive and obligation to contribute to the continued growth of your business in the coming year by providing attractive new products and eye-catching campaigns. A special example of this is the new KARLBOX, which is being developed in cooperation with Karl Lagerfeld and will be the focus of an international PR and marketing campaign. Many additional products, gift ideas and new POS solutions will also be accompanying this extraordinary introduction.

In future, Faber-Castell will also continue its value-oriented and sustainable course as a premium-oriented and creative lifelong companion. The significance of handwriting and hand drawing for the development of creativity and fine motor skills is undisputed, and will become increasingly essential for future generations. Let's work together to tap into the associated market potential in this regard!

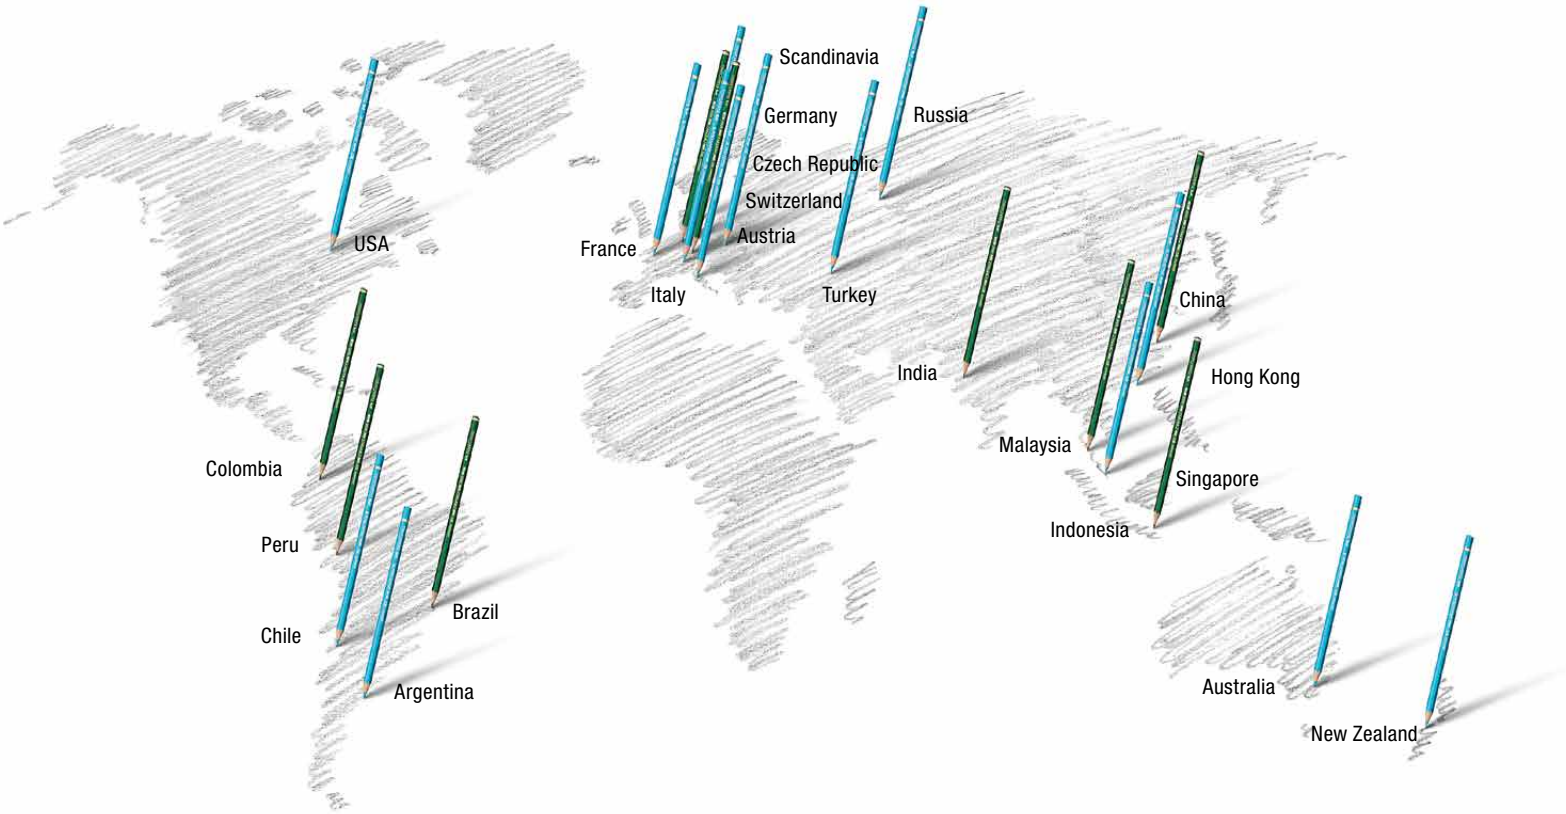
With kind regards from Stein.
Yours sincerely, Rolf Schifferens
Executive Management Europe / North America

* According to a 2015 customer confidence index from German business magazine WirtschaftsWoche, Faber-Castell takes first place among 973 companies from 62 industries. It was based on a survey of 278,000 customers.

FABER-CASTELL
since 1761

The international group of companies

Faber-Castell employs some 8000 people around the globe, and has its own production sites in 9 countries as well as sales companies in 22 countries. The extensive supply chain for all sites producing wood-cased pens using wood from sustainable forestry is indicative of the leading position the Faber-Castell Group holds in environmental matters.



Overview of Faber-Castell's production plants and sales companies around the world

Production plants Sales organisations

Climate protection starts with the product – global CO_2 neutrality is unique in the writing instrument industry

TÜV Rheinland has certified that the company is CO_2 neutral worldwide. The company's eco-forests in Brazil and Columbia actively contribute to protecting the environment.
Instead of touting individual "green products", Faber-Castell minimises its environmental footprint throughout the entire life cycle of its product range. Faber-Castell products are green because they are long-lasting, often refillable as well as pollutant-free, and come from CO_2-neutral production. The use of bio and recycled plastics also improves the "green footprint" of Faber-Castell.
